If you are taking your healthy juicing lifestyle serious and your are looking to buy a new juicer, you want to have one that can live up to your needs. Daily heavy use should not be a problem. So the material it is made of should not wear out or get stained easily. The breville juicer looks very promising in that area.

When reading online reviews of the Breville 800JEXL Juice Fountain Elite you will soon find out, that this breville juicer delivers what it promises. We have examined the breville juice fountain carefully, to see what all these raving reviews are about.

When you first take your new juicer out of its box you will be surprised how big it actually is, but this impression will soon be followed by a strong admiration of its sleek metal design and its beautiful shape, which will fit really well in any contemporary designer kitchen, and all other kitchens as well, of course.

But there is much more to it than just design. It is very quickly assembled and disassembled and it is dishwasher proof. Actually all parts of this Breville juicer that come in contact with the fruits or vegetables are made of stainless steel, which makes it very durable and hygienic. It comes with a titanium plated blade which has no problems to disintegrate all kinds of fruits and veggies in no time. It can automatically adjust the speed of the blade according to the load you put into the juicer.

One of the best features is the extra wide feeding chute of 3" which makes it possible to throw in whole fruits. This saves you a lot of time, no peeling and chopping of fruits and vegetables needed, except for really big ones. You literally only need a few seconds to make yourself a glass of wonderful tasty fresh juice. You will be amazed by the speed of this Breville Juice Fountain – a name that it really deserves. The quality and taste of the juice it delivers is equal if not even better than the juices you can buy in Juice bars.

This Breville juicer is a centrifugal juicer, which means the juice is separated from the pulp by spinning force. There are masticating juicers, which are a bit more efficient, but also much slower (and more expensive). Wouldn't you prefer a much faster juicer that saves you lots of time every day, so you can concentrate on the important things in your daily life and not be preparing juice all day long?

We tried to find out if there are negative points to say about this juicer as well. But most of the few negative reviews to be found, are due to wrong usage or bad maintenance. Make sure to clean the filter after each use to prevent juice to flow in the pulp bin and therefore decreasing the juicer's efficiency. The manual that comes with the Breville 800JEXL Juice Fountain Elite is very helpful and gives a few good tips on its use, as well as a lot of juice recipes to get you started.

Rating: ★★★★★ – We absolutely love this juicer. In our opinion the best investment you can make in your own health.
